Senior Product Designer with 18+ years of experience making complex enterprise, healthcare and AI products easier to use. Led UI design for IQVIA's OCE, a regulated life sciences CRM that launched in 2017 and grew to close to 400 enterprise customers in 130+ countries. I turn user stories and customer journeys into clear flows, tested prototypes and polished UI, build design systems that keep large products consistent, and work with Product, Engineering and executives to shape what gets built.

EDUCATION

PARSONS SCHOOL OF DESIGN, NEW YORK, NY | September 2002 – May 2006
BFA in Communication Design

COMPUTER SKILLS

MAC/PC CROSSPLATFORM
Figma, Auto Layout, Components, Variants, Variables, Design Tokens, Prototyping, Wireframing, Interaction Design, Responsive Design, Design Systems, AI/ML Design, AI-assisted workflows, Enterprise SaaS, B2B, Healthcare Technology, Complex Workflows, Customer Journeys, Accessibility, WCAG/ADA, User Research, Usability Testing, Adobe Creative Suite, After Effects, WordPress, Shopify, PowerPoint, HTML, CSS, Ceros

WORK EXPERIENCE

UNISYS, BLUE BELL, PA | July 2025 – April 2026
UI/ML Designer

- Built the Unisys design system in Figma: 478 variables in two layers (raw values and named tokens) with light and dark modes, 44 text styles and 11 component families, so new screens start from finished parts and dark mode needs no redesign.
- Used the system to design dashboard and AI tool screens for desktop and mobile, proving the components in real layouts.
- Designed client presentations and product videos showing key features and workflows for sales and marketing.

MOBEUS INDUSTRIES, SPARTA, NJ | January 2021 – June 2025
Head of Design

- Led product UI and the spatial design system for Airglass, a browser-based 3D meeting platform. One system powered two client spaces: a Verizon retail store and a 28-screen United Therapeutics device training flow.
- Mapped host and guest journeys separately: a one-step entry for guests (just a name, no account or app) and a host panel with the customer's Salesforce record and one-click, AI-suggested CRM updates during the call.
- Gave every voice and gesture command an on-screen button, so first-time users could get around without instructions.
- Designed the Verizon proof of value leadership used to pitch connecting website shoppers with in-store reps.

KKR, NEW YORK, NY | November 2022 – November 2024
Freelance Digital Designer

- Rolled out KKR's brand redesign across web, product, social and email, and built reusable card, motion and vertical video templates that kept content consistent across channels.

IQVIA, WARREN, NJ | March 2015 – December 2020
Assoc. Director, UI Designer

- Led UI design for OCE, IQVIA's iPad CRM for life sciences field teams: about 190 screens across 5 personas, including regulated call logging and multi-step meeting approvals. Launched December 2017; adopted by 30+ companies in year one and grew to close to 400 enterprise customers in 130+ countries.
- Managed and mentored a team of 5 UX/UI designers. Set spec standards and UI guidelines (color tokens, type scale, icon font) that kept 190 screens consistent.
- Turned personas and user stories into epic maps and numbered flows that surfaced missing business rules early. QA ran them as test scripts.
- Built high-fidelity prototypes for usability testing and stayed with Engineering through implementation.
- Designed Territory Designer, a sales territory planning tool, from requirements and wireframes to a 496-screen clickable prototype, with in-app approval that moved sign-off out of email.

FRESH SQUEEZED, NEW YORK, NY | December 2011 – December 2012
Co-Owner, Designer

- Developed brand identities, web and mobile experiences, and integrated visual communications for clients from new businesses to established organizations.

BUTTONED UP, INC., NEW YORK, NY | May 2005 – December 2013
Design Director

- Led identity and product design across web, ecommerce, retail, email, mobile apps, campaigns and print.

MINDSET MEDIA LLC, NEW YORK, NY | May 2006 – November 2010
Design Director

- Designed identity systems, websites, HTML email, presentations and integrated visual communications.
